Congratulations on protecting your windshield with ClearPlex Invisible Windshield Protection Film. Remember, this film is not as hard as a windshield and is not permanent. There are several things you can do to improve the effectiveness and prolong the life of ClearPlex.

CARING FOR CLEARPLEX

- Apply a small amount of ClearX HD to your ClearPlex film at the time that the film is installed on your windshield, and every other month during the life of the ClearPlex film.
- Remove any debris from the windshield wipers. Debris not removed prior to using the windshield wipers can scratch the film.
- Always use washer fluid when cleaning the windshield with wipers. Do not run the windshield wipers dry, as dry debris on wipers can scratch the film.
- Use only approved treatments on ClearPlex film in order to protect the hard coat and maintain the original condition of the film.
- Do not use any sort of acid wash on ClearPlex; it will ruin the film.
- Do not use sharp objects on the ClearPlex film. Windshield scrapers are fine, just make sure any type of scraper edge used on the ClearPlex film is not chipped or pitted. If your windshield scraper is damaged, chipped, pitted or rough, please replace your scraper.
- Clean ClearPlex regularly to remove staining items such as tree sap, bird droppings, tar, oils and bugs. Avoid using any cleaning solutions that contain petroleum distillates, alcohol, and silicone oils or like ingredients. Use a mild soap with water, and a soft cloth to clean.
- When cleaning your vehicle and/or windshield, do not point high-pressure water directly at the windshield. Do not put the exit of the high pressure water within three feet of the windshield. Use soft brushes or clothes to clean the windshield, and use the water to softly rinse the film. This will prolong the life of the scratch resistant coating.

Drying and curing time is necessary for proper bonding of the Invisible Windshield Protection Film to your windshield. To insure initial bonding, do not high-pressure wash the Invisible Windshield Protection Film for a period of 72 hours after installation. No claim under this Limited Warranty will be valid if the Invisible Windshield Protection Film is subjected to high-pressure wash equipment within 72 hours of installation.

DO NOT OPERATE YOUR VEHICLE IF THE INVISIBLE WINDSHIELD PROTECTION FILM YELLOWS, CRACKS, BUBBLES UP, PEELS OR OTHERWISE ADVERSELY IMPAIRS THE CLARITY OF THE WINDSHIELD. OPERATION OF YOUR VEHICLE UNDER SUCH CONDITIONS MAY CAUSE SERIOUS DAMAGE OR INJURY TO YOU, YOUR VEHICLE OR OTHER PERSONS. ClearPlex hereby disclaims liability for damage or injuries caused by operation of your vehicle under such conditions. The ClearPlex Invisible Windshield Protection Film should be removed from the windshield immediately if any of the above mentioned physical conditions of the Invisible Windshield Protection Film exist.

HOW TO REMOVE CLEARPLEX

- Using an object such as a knife or key, lift up one corner of the film. Using constant pressure – pull the film off the windshield.
- If you decide you would like to use a knife or blade to score the film, cut the film with a stainless steel blade only. A stainless steel blade used with moderate pressure will not scratch the windshield. Other types of metal blades may scratch the windshield.
- Clean your windshield of any adhesive remaining on the glass using soap and water.
